## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 25-56, 62, 71, 80, 89, 98, 107, 116, 125, 134, 143, 152, 161, 170, 179, 188, and 197 are rejected under 35 U.S.C. 103(a) as being unpatentable over Camm et al (US6594446) in view of Noguchi (US5219786) and Granneman et al (US6461439).

Camm et al discloses disposing a substrate (38) in a reaction tube (48), supplying a gas (column 11, lines 5-9; column 20, lines 35-40) into a reaction tube (48), in a first stage heating a substrate (column 9, lines 11-13) via a light/lamp source (62), in a second stage heating a substrate (column 9, lines 14-18) via a light/lamp source (44) in a pulsing form with a cycle of one second or longer (column 13, lines 28-31, 41-50), and supplying a cooled gas (column 11, lines 5-9; column 18, lines 49-52). Camm et al does not disclose a light source selected from the group consisting of a halogen, metal halide, high pressure mercury, high pressure sodium, or a xenon lamp, a heated gas, and reduced pressure. Noguchi discloses a halogen lamp as a light source (column 4, lines 35-36) and Granneman et al discloses a heated gas (abstract) and reduced pressure (column 3, lines 65-67). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have included the halogen lamp of Noguchi and the heated

gas and reduced pressure of Granneman et al in the method of Camm et al because, a halogen lamp, heated gas and reduced pressure allows the substrate to be more uniformly heated.

***Allowable Subject Matter***

3. Claims 29032, 37-42, 45-48, 53-56, 80, 89, 116, 125, 134, 152, 161, 188, and 197 are allowed.

***Response to Arguments***

4. Applicant's arguments with respect to claims 25-56, 62, 71, 80, 89, 98, 107, 116, 125, 134, 143, 152, 161, 170, 179, 188, and 197 have been considered but are moot in view of the new ground(s) of rejection.
